Profile

Computer Engineering student passionate about building impactful solutions through software development. Experienced in developing responsive web and mobile applications with clean UI and structured backend integration. Continuously strengthening skills in Data Structures and Algorithms, database management, and full-stack development. Committed to collaborative learning and professional growth in technology.

Education

Rajarambapu Institute of technology, Islampur **2026 - Present**
- Computer Science & Engineering | CGPA: **8.60**

Rajarambapu Institute of technology , Islampur **2021 - 2024**
- Diploma | Computer Engineering | Score: **89.75**

Jawahar Navodaya Vidyalaya Palus , Sangli **2016 - 2021**
- SSC (Class X)| Score: **89.00**

Internship

Industrial Training | ITnium Training Institute, Sangli **Apr - Jun 2023**
- Gained experience in web development with Basic HTML , CSS , JavaScript , React, Python, MySQL, and AWS(EC2).
- Built responsive websites, strengthened Python fundamentals, and gained hands-on experience with Git version control.

Skills

Programming Languages: C++, Java, JavaScript
Web Technologies: HTML, CSS, React , NodeJs
Databases: MySQL, MongoDB
Tools : VS Code, MySQL Workbench, Git-GitHub , Google Colab , Android Studio
Core Concepts: Object-Oriented Programming (OOP), DBMS, Data Structures (Basic)
Soft Skills: Problem-solving, Communication, Hardworking, Team Collaboration, Time Management, Willingness to learn

Projects

Centralized Training and Placement Web Portal | (In Progress)
- Developing a centralized web platform to automate and digitize the college placement management process, replacing manual and scattered workflows. role-based access for Students, TPCs, and TPO to manage profiles, verify documents, announce drives, and monitor placement statistics.

Language Lab Software | Web Application
- Developed a web-based English Language Lab to enhance students' communication, grammar, and pronunciation through interactive modules. Implemented role-based panels (Admin, Teacher, Student) for user management, assignments, and progress tracking

Pet Adoption Web Application | MERN Stack
- Built a responsive MERN-based web application connecting pets with potential adopters. Implemented pet listing management, multi-image uploads, and adoption request handling.

Employee Gamification App | Android Application
- Developed a gamified task management app to enhance employee engagement through points, badges, and leaderboards. Designed role-based modules (HR/Admin, CEO, Employee) for task assignment and real-time performance tracking.

Achievements

Realtime Excellence |
- Successfully Deployed English Language Lab Software at RIT collage, enabling 100+ students to use it for learning sessions.

Hackathon Participation |
- Participated in National level Hackathon(Brain It On) at PVPIT Budhgaon ,

Problem Solving Badge | https://www.hackerrank.com/profile/polsudesh51
- HackerRank – Problem Solving (Silver Badge, 706+ points)

Certifications

- **Programming in Java (January – April 2025) |**NPTEL
- **Database Management Systems (July - September 2025)** | NPTEL
